

Welcome to the Digital Revolution

Exceptional Products, Superior Service

Our latest print operation is our digital workflow, which utilizes the newest dry toner-based technology from Xeikon and state-of-the-art finishing from world-renowned AB Graphics. This high-end technology provides brilliant graphics at 1200 dpi with the ability to print on virtually any substrate or material, including films, foils, static cling and paper stocks, with no additional coating of materials.

Relm West Digital is an ideal solution for small to medium run products, promotional items, indirect food contact film wrap, mock ups and market samples, variable data files, wine labels and high-end graphics. The flexibility of reduced or no set up costs, no plate and art charges and direct from file to print provides excellent turnaround times, low tooling cost and high-end print quality.

Superior Performance Advantages of our Xeikon 3300 Digital Press

- o Variable Repeat Length — no restrictions
- o Width Maximum 13"
- o One Pass opaque white toner on transparent label and film stocks to create "no label look."
- o No need for expensive or special digital stocks.
- o Maintains uniform, accurate color with perfect registration throughout the run and consistency from job to job.
- o Xeikon 3300 can utilize an unmatched array of substrates ranging from pressure sensitive stocks, co-extruded film, unsupported film, paper, transparent and opaque foils as well as paperboard, with weights ranging from 1.2mil to 12 point board stock.
- o Finished product is fully recyclable and FDA compliant for indirect and direct food contact.
- o Reduced set up times compared to standard flexo printed products.
